PROFESSIONAL SUMMARY

Technical Lead with 10+ years of experience building distributed systems and high-performance web/mobile applications using React, Node.js, and AWS. Delivered measurable impact, including **50–80% latency reduction**, 30% faster release cycles, and systems supporting 2000+ users and 500+ institutions. Strong experience in designing backend systems, optimising performance, and leading engineering teams across startup and enterprise environments.

SKILLS

Languages: JavaScript, TypeScript

Frontend: React, React Native, Redux

Backend: Node.js, Express.js, REST APIs

Databases: PostgreSQL, MongoDB, DynamoDB

Cloud & DevOps: AWS (Lambda, Cognito, AppSync, S3), CI/CD

Tools: Jest, Git

Core: System Design, Performance Optimisation, Distributed Systems

PROFESSIONAL EXPERIENCE

Deque Systems — *Lead Software Engineer* (May 2023 - Present)

- Owned development of accessibility platform used by Apple, FBI, and US Bank; led team of 4 engineers using React, TypeScript, Node.js, Express.js, and AWS (Lambda, AppSync, Cognito)
- Reduced API latency by **50–80%** via PostgreSQL optimisation; migrated **~380GB of data from RDS to S3**, lowering infrastructure cost and improving data efficiency
- Accelerated delivery by ~30% using CI/CD, Git workflows, and Jest testing; strengthened code quality, reducing production defects to near zero through improved testing, code reviews, and release processes
- Designed system architecture to support high-volume accessibility testing workflows across enterprise clients

Infinity Works (Accenture) — *Tech Lead* (Aug 2022 - Apr 2023)

- Led a team of 4 building a React Native app (Redux, TypeScript); improved application stability, reducing crash frequency and production incidents across releases and improving overall app reliability
 - Reduced technical debt and resolved critical security vulnerabilities in REST APIs, lowering production risk and improving system reliability
-

Gnxt Systems — *Mobile Lead Engineer* (Nov 2021 - Aug 2022)

- Built an EV charging app from scratch (React Native, Node.js, Express.js) with real-time tracking and maps integration, improving user navigation and accessibility
- Implemented TCP-based communication layer for device connectivity, resolving limitations in existing libraries and enabling reliable real-time interaction with EV charging hardware
- Designed REST APIs handling real-time data processing

RSystems International — *Senior Software Engineer* (Jan 2021 - Nov 2021)

- Developed OTT apps (React Native, Redux, TypeScript); optimised EPG screen performance using caching, lazy loading, and efficient rendering, improving UI responsiveness
- Integrated AWS services (DynamoDB, Cognito, AppSync), improving backend availability and response consistency under load

CodeKrypt Technologies — *Co-founder / Technical Lead* (Jan 2018 - Jan 2021)

- Led team of 6; built ride-hailing platform (**2000+ drivers**) and ERP system (**500+ schools**) using MERN stack
- Designed backend systems and real-time features using Node.js, Express.js, MongoDB, Socket.io; ensured stable system behaviour under concurrent usage

Velocity Software — *Software Engineer* (Aug 2015- Jan 2018)

- Built e-commerce and stock systems (PHP, JS); increased processing efficiency by 60% and revenue by 40%
- Integrated payment gateways (Stripe, PayPal), improving transaction reliability and checkout performance

AWARDS & ACHIEVEMENTS

- Turing (Top 1%), Toptal (Top 3%), Uplers (Top 3.5%) Certified Talent
- Employee of the Quarter (3x) — Deque Systems
- Employee of the Month (2x), Excellence Award — Velocity Software
- Built systems improving performance by 60% and scaling to 500+ schools and 2000+ drivers

EDUCATION

Bachelor of Technology (B.Tech) — IET Lucknow (2011–2015)
